XIDEK License*

This software is provided 'as-is', without any express or implied warranty. In no event will Parsifal Software be held liable for any damages arising from the use of this software.

Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:

The origin of this software must not be misrepresented; you must not claim that you wrote the original software. If you use this software in a product, an acknowledgment in the product documentation would be appreciated but is not required.

Altered source versions must be plainly marked as such, and must not be misrepresented as being the original software.

This notice may not be altered or removed from any source distribution.

* This license conforms to the zlib/libpng license. See the listing of approved licenses maintained by the Open Source Initiative. The zlib/libpng license was chosen for its simplicity and because it allows commercial use. Note, however, that a distribution that contains modified syntax (.syn) files requires a valid license for the AnaGram Parser Generator in order to generate the corresponding parser files. Trial copies of AnaGram are available at no charge at the Parsifal Software www.parsifalsoft.com website.

PCRE LICENCE

PCRE is a library of functions to support regular expressions whose syntax and semantics are as close as possible to those of the Perl 5 language.

Release 8 of PCRE is distributed under the terms of the "BSD" licence, as specified below. The documentation for PCRE, supplied in the "doc" directory, is distributed under the same terms as the software itself.

The basic library functions are written in C and are freestanding. Also included in the distribution is a set of C++ wrapper functions, and a just-in-time compiler that can be used to optimize pattern matching. These are both optional features that can be omitted when the library is built.

THE BASIC LIBRARY FUNCTIONS
